Profile Summary

Full-stack developer with strong experience in MERN stack and modern web technologies. Skilled in designing responsive, user-friendly applications, integrating backend services, and implementing secure authentication. Passionate about building efficient, scalable systems with a focus on performance and maintainability.

Education

B.Tech in Computer Science and Engineering

Govt.Engineering College Painavu

October 2022 - April 2025

Idukki, Kerala

Diploma in Computer Engineering

Maharajas Technological Institute, Thrissur

August 2019 – may 2022

Thrissur, Kerala

Relevant Coursework

- | | | | |
|--------------------|-----------------------|---------------------------|-------------------------|
| • Data Structures | • Algorithms Analysis | • Artificial Intelligence | • Systems Programming |
| • OOP through Java | • Database Management | • Computer Internet | • Computer Architecture |

Experience

Innobyte Services

Web Developer Intern

July 2024 – August 2024

- Designed and developed static web pages using HTML5 and CSS3.
- Created responsive layouts using Flexbox and media queries.
- Converted UI designs into clean, structured HTML and CSS.
- Ensured cross-browser compatibility and basic accessibility standards.

Limenzy Technologies Pvt Ltd

MERN Stack Intern

Sept 2025 – Present

- Developing full-stack web applications using MongoDB, Express.js, React, and Node.js.
- Implemented authentication, role-based access control, and RESTful APIs.
- Worked with Redux for state management and optimized application performance.
- Participated in code reviews and followed best development practices.

Projects

Job Application Tracker | *MongoDB, Express.js, React.js, Node.js (MERN)*

- Developed a full-stack job application tracking platform to help users manage and monitor job applications efficiently.
- Implemented secure user authentication for registration, login, and profile management.
- Built admin functionalities to create, update, and delete company profiles and job postings.
- Enabled users to apply for jobs and track application status, dates, and related notes in real time.
- Implemented job search functionality based on job title, company name, and keywords.
- Added company subscription and custom job alert features to notify users about relevant job openings.

YourStore – E-commerce Platform | *Next.js, Node.js, Express.js, MongoDB, Redux*

- Developed customer features including product browsing, cart management, wishlist, and secure purchase flow.
- Built an admin panel for product CRUD operations and customer account activation and deactivation.
- Implemented Redux Toolkit for efficient global state management across the application.
- Integrated automated email notifications for customer account status updates.

Hydro Predict | *React.js, PostgreSQL, XGBoost*

- Developed a dam water level prediction and monitoring system using machine learning models.
- Designed a React.js frontend for real-time dashboards and interactive data visualization.
- Implemented XGBoost models to forecast water levels and support proactive decision-making.
- Used PostgreSQL for efficient storage and retrieval of historical and live dam data.
- Enhanced early warning capabilities and monitoring accuracy for water resource management.

SoftLab | *ReactJS, MySQL, PHP*

- Designed and developed a digital laboratory stock management system to automate inventory tracking.
- Implemented features for stock addition, updates, and real-time availability monitoring.
- Built a responsive React.js frontend integrated with a PHP backend and MySQL database.
- Enhanced data accuracy and optimized resource utilization within laboratory operations.
- Reduced manual errors and improved operational efficiency through digitized inventory workflows.

Doctor Care | *JavaScript, Firebase*

- Developed a Digital system for efficient retrieval the all data of patients health and doctor booking as per requirement during the covid-19 circumstances.
- Patient can retrieve his/her medical information at anytime and anywhere by using his/her mobile phone.
- Implemented Using JavaScript, Firebase

Technical Skills

Programming Languages: Java, JavaScript (ES6+), C, SQL

Frontend: React.js, Next.js, Redux Toolkit, HTML5, CSS3

Backend: Node.js, Express.js, RESTful APIs

Databases: MongoDB, PostgreSQL, MySQL, Firebase

Tools: Git, GitHub, VS Code, Postman

Other: JWT Authentication, RBAC, API Integration

Language

- Malayalam
- English
- Tamil

Soft Skills

- Quick Learner
- Teamwork
- Active listening
- Adaptability
